Second Level Master's Degree Course

ROBOTIC UROLOGICAL SURGERY

Director Prof. Giorgio Guazzoni

The aim of the Second Level Master's Degree Course in Robotic Urological Surgery is to provide specialists in urology and general surgery with the necessary skills for a modern and comprehensive approach to treat patients with urological disease. The complete training includes all therapeutic options which may be required with the use of a surgical robot. The Master's Degree includes lectures, simulator training, practice with animal models and operating room training under mentor guidance. The master course consists of six weeks which will be distributed throughout the 2011/2012 academic year. The specialists will be trained by both national and international staff.

Site

The Second Level Master's Degree Course in Robotic Urological Surgery training will take place at the San Raffaele Hospital, Department of Urology and our administrative offices are located at the San Raffaele University Hospital "Vita-Salute".

Registration

The Master's Degree is aimed at Medicine and Surgery graduates who have specialized in Urology or General Surgery. The number of participants is limited to 4.

Tuition fee € 2.500,00
